AUDIO/VISUAL INFORMATION FOR DAYNA STEELE

Microphone

Dayna appreciates a lapel clip-on wireless microphone. If possible, have a wireless handheld microphone available for back up. Dayna does not use a headset microphone.

Sound Check

Dayna arrives to the event room about one hour before the presentation for A/V check. It is requested that someone be present for this sound check and during the first five minutes of the presentation to double check that things are working properly.

Screen & Projector

Dayna uses photographs in her presentation. Please provide a projector and screen large enough for all to see in the room. (A wall is fine as well.) No speakers are needed.

Computer

Dayna brings her own laptop computer and remote. The presentation is also available in advance or on a flash drive.

Lighting

Make sure that the stage and the audience are well lit.

Other

Dayna likes to go out into the audience and move among the participants. This information could be helpful to your sound engineer to prevent feedback from the speakers.

Please note:

Dayna does not use a podium (she is short, not difficult!)

If you have any questions, please email us at info@daynasteele.com.
